Information Disclosure Statement

The following is a quotation of 37 C.F.R. 1.56 which forms the basis of the duty to disclose information material to patentability:

(a) A patent by its very nature is affected with a public interest. The public interest is best served, and the most effective patent examination occurs when, at the time an application is being examined, the Office is aware of and evaluates the teachings of all information material to patentability. Each individual associated with the filing and prosecution of a patent application has a duty of candor and good faith in dealing with the Office, which includes a duty to disclose to the Office all information known to that individual to be material to patentability as defined in this section. The duty to disclose information exists with respect to each pending claim until the claim is cancelled or withdrawn from consideration, or the application becomes abandoned. Information material to the patentability of a claim that is cancelled or withdrawn from consideration need not be submitted if the information is not material to the patentability of any claim remaining under consideration in the application. There is no duty to submit information which is not material to the patentability of any existing claim. The duty to disclose all information known to be material to patentability is deemed to be satisfied if all information known to be material to patentability of any claim

Art Unit: 1794

issued in a patent was cited by the Office or submitted to the Office in the manner prescribed by §§ 1.97(b)-(d) and 1.98. However, no patent will be granted on an application in connection with which fraud on the Office was practiced or attempted or the duty of disclosure was violated through bad faith or intentional misconduct.

Applicant is reminded that they have a duty to disclose information that is material to patentability. The information disclosure statement is not intended to be a reference library of all the information that may pertain to the art disclosed in the patent. Only references that are material to the patentability of the claims are to be listed in the information disclosure statement. A listing of approximately 1000 references is evidence that the applicant has performed a generic search in the required art; however, such a search may also be evidence that applicant has not performed a search for references that are specifically material to the patentability of each pending claim.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Leslie Wong whose telephone number is (571)272-1411. The examiner can normally be reached on Tuesday to Friday.
